# LEAVE MANAGEMENT

Leave management for a better quality of work life

*Presented by Saruj Chutapornpong · Intern*

THE PROBLEM

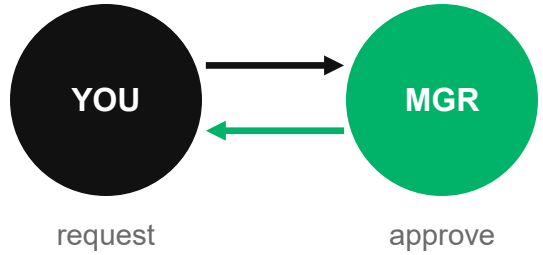

# *Pain Point*

**Today, leave is manual.** You DM your manager, and they jot it down by hand. Requests get lost, balances drift, and nothing lands on a calendar.

THE FIX

One Slack command. The manager approves or declines with a single click — then it auto-saves to the database and shows up on the calendar.

THE LOOP, IN ONE CLICK

TTMI

WHAT WE'RE BUILDING

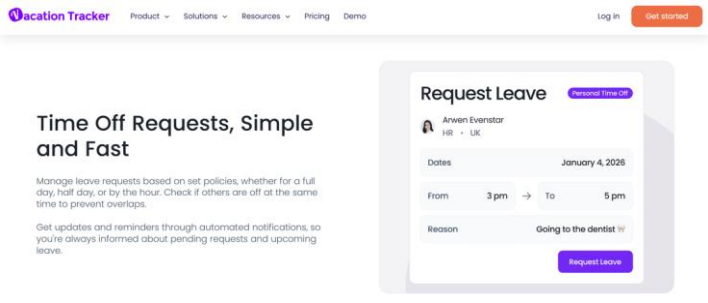

# Scope

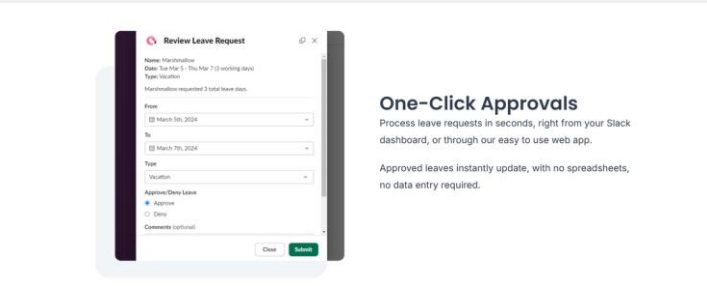

1. Slack-native — no new app to learn
2. Built for small-to-medium teams
3. Covers the full leave-request cycle
4. In-Slack admin control plane
5. Lands on the calendar and a sheet

TTMI

THE OBVIOUS QUESTION

# *Why not just buy SaaS?*

*Vacation Tracker · Flamingo — polished, but…*

## Cost

Subscription pricing is too expensive for a small team.

## Privacy

Leave data is sensitive — we'd rather keep it in-house.

## Feature fit

Off-the-shelf tools rarely match our exact policy.

**TTMI**

HOW WE DECIDED

# *Design Principles*

| | |
|---|---|
| **Cost** | Pay-per-use — you only pay for what you run |
| **Place** | Lives inside Slack, where people already are |
| **Features** | Fits our exact rules — no bending policy to a product |
| **Control** | We own the data and the logic |

TTMI

FIVE COMMANDS, TWO GROUPS

# Core Functions

## FOR EVERYONE

| | |
|---|---|
| **/dayoff** | Open the request modal |
| **/dayoff-cancel** | Cancel a pending request, or early-return an active leave |
| **/advance** | Leave Optimizer — find your longest possible break |

## FOR ADMINS & MANAGERS

| | |
|---|---|
| **/control** | Admin control plane: policy, holidays, reports & more |
| **/burnout** | Track team burnout risk and nudge people to rest |

TTMI

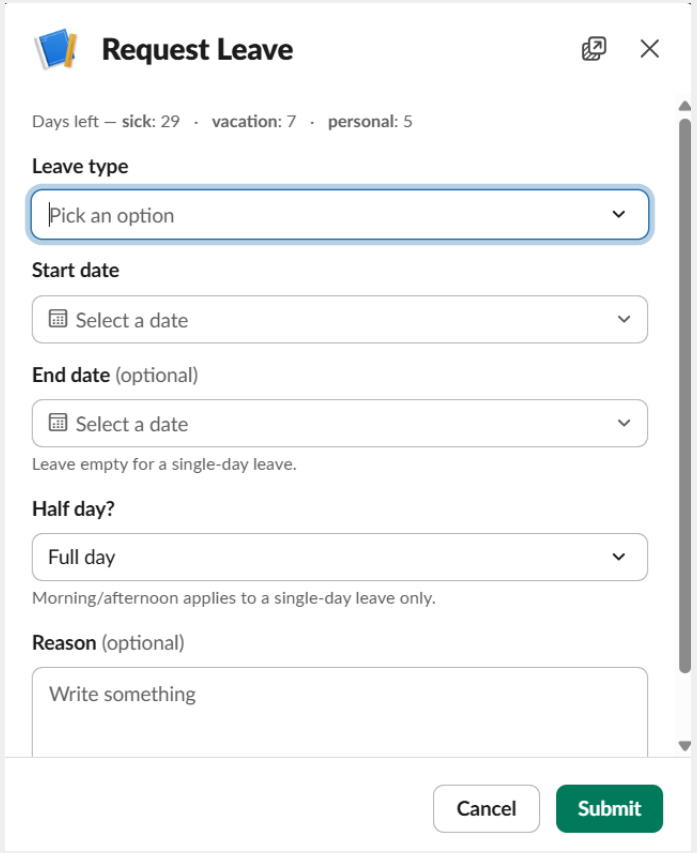

# DEMO

## Part 1 — the commands everyone uses

/dayoff · /dayoff-cancel · /advance

# /dayoff

## REQUEST A LEAVE

*One modal, everything on it*

### IN ONE FORM

- Pick a leave type — each has its own quota
- Choose a start date (and end date for multi-day)
- Optionally take just a morning or afternoon
- Add a reason if you'd like

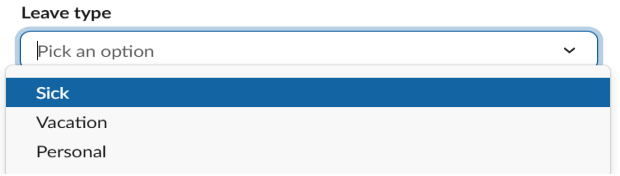

TTMI

# /dayoff

## THE OPTIONS

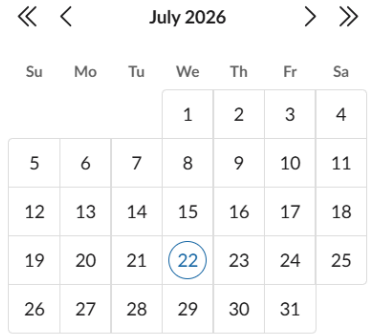

### Leave type

Sick · Vacation · Personal — each tracks its own balance

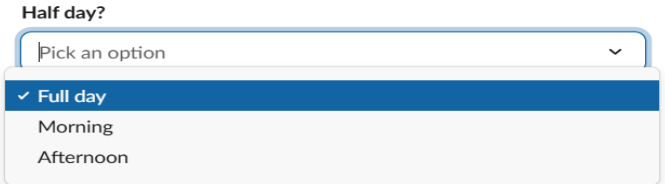

### Dates

Start date for a single day;
add an end date for longer

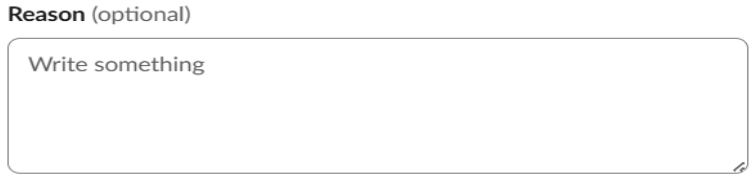

### Half day

Take just a morning or an afternoon

### Reason

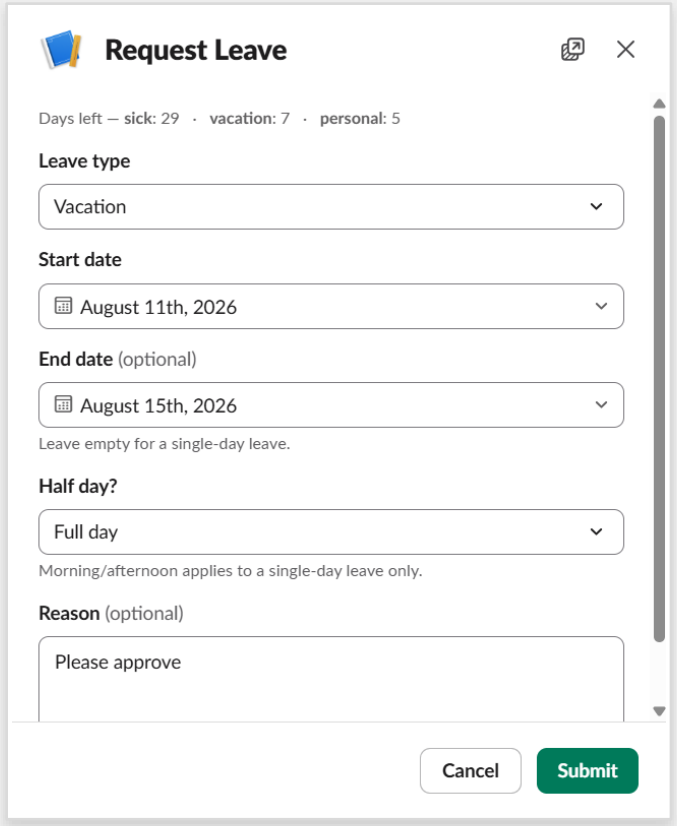

Optional note to your approver

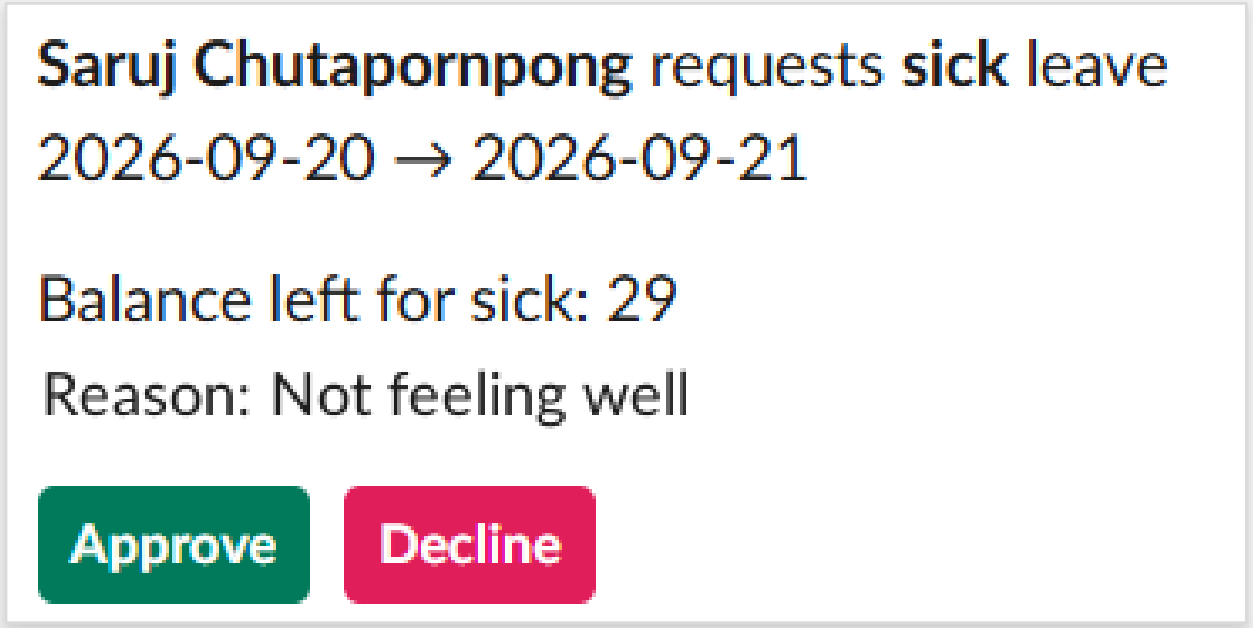

TTMI

# /dayoff

## SUBMIT → APPROVE

submit →

**The manager gets a one-click card**

- Sees who, what type, dates, balance & reason
- Approve or Decline — no spreadsheet, no typing

TTMI

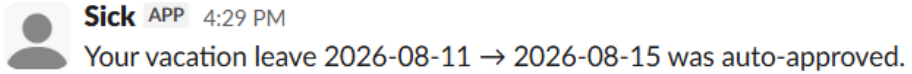

# /dayoff

## TWO PATHS

AUTO

### Auto-approve

For people at the top of the chain — the leave clears the moment they submit.

MANAGER

### Approval needed

Routed to a manager as an approve / decline ticket.

TTMI

# /dayoff-cancel

## UNDO A LEAVE

*Pick the request you want to drop*

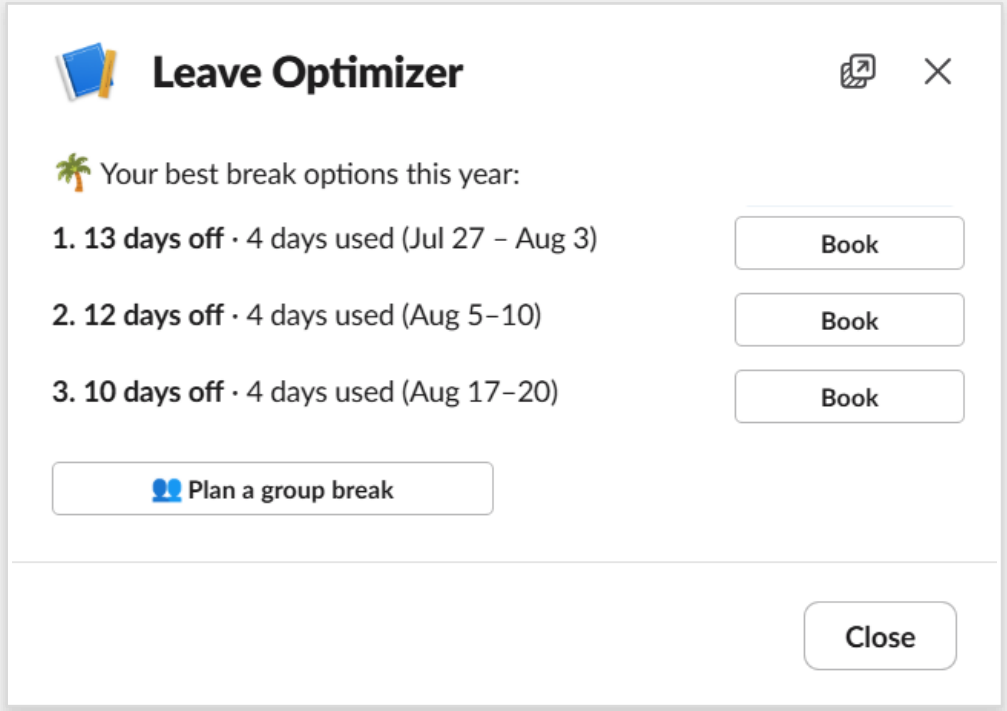

### WHAT IT DOES

- Cancel any pending or future request
- Get the reserved quota back instantly
- Early-return a leave already in progress — you're only charged for the days you took

TTMI

# /advance

LEAVE OPTIMIZER

PLAN SMARTER

## *Stretch your days off*

- Finds the longest break your remaining days can buy
- Uses weekends and public holidays as free bridges
- Book the winning window straight from the card

TTMI

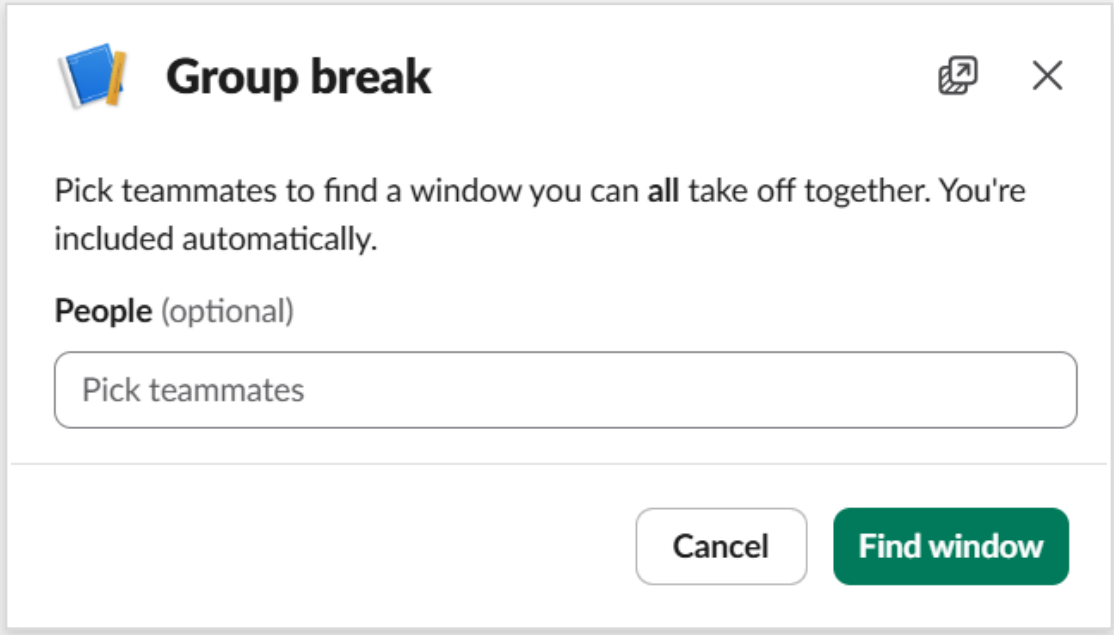

# /advance

GROUP BREAK

TAKE TIME OFF TOGETHER

## *One window for the whole team*

- Pick your teammates — you're included automatically
- The optimizer finds a window everyone can take off
- Great for team offsites or a shared long weekend

TTMI

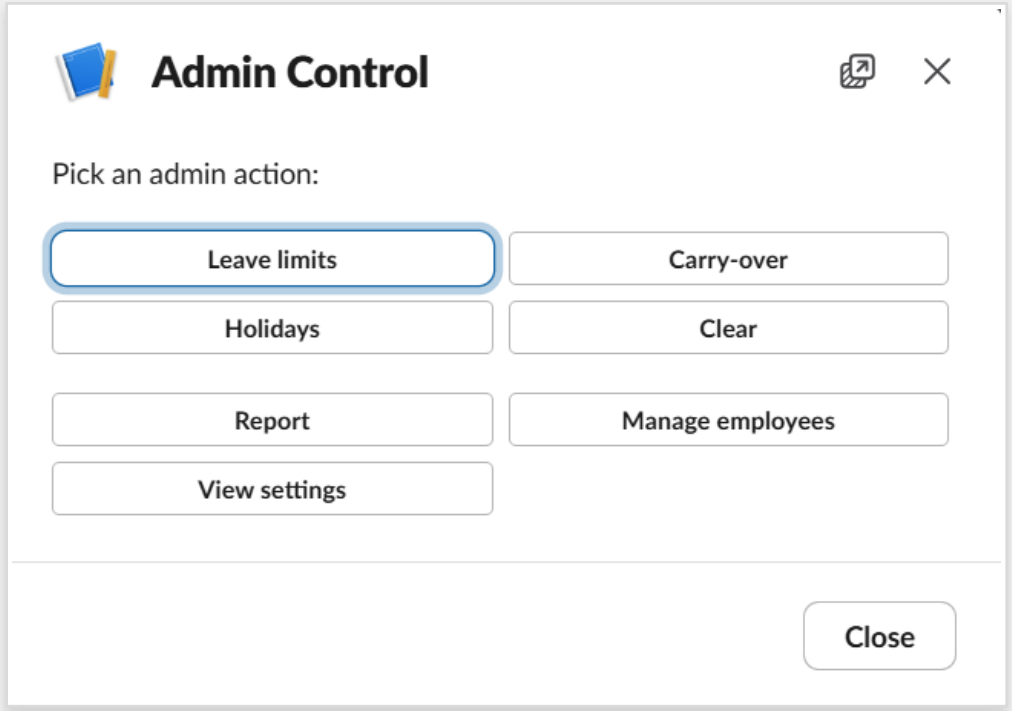

# DEMO

## Part 2 — admin & manager tools

/control · /burnout

# /control

## ADMIN MENU

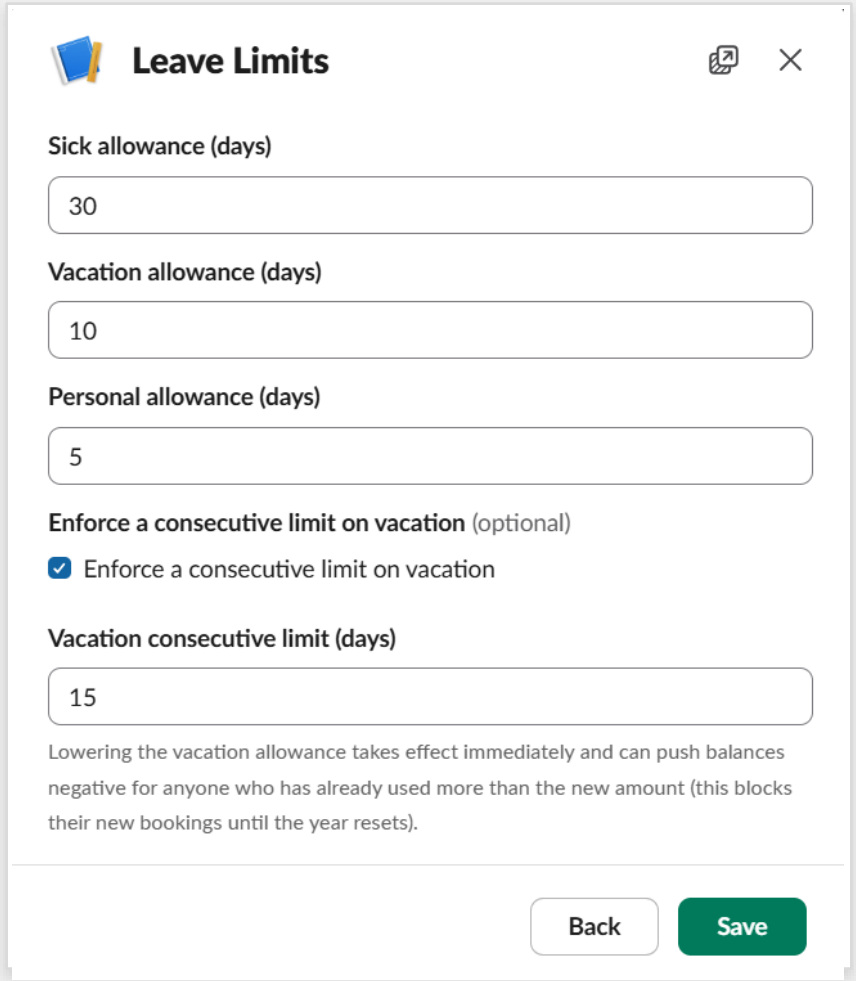

- **Leave limits** — set global quota
- **Carry-over** — roll days into next year
- **Holidays** — add, remove or import
- **Report** — usage & burnout, as CSV
- **Manage employees** — names, managers, overrides
- **View settings** — current policy at a glance
- **Clear** — reset the database

TTMI

# Leave limits

/control › **Leave limits**

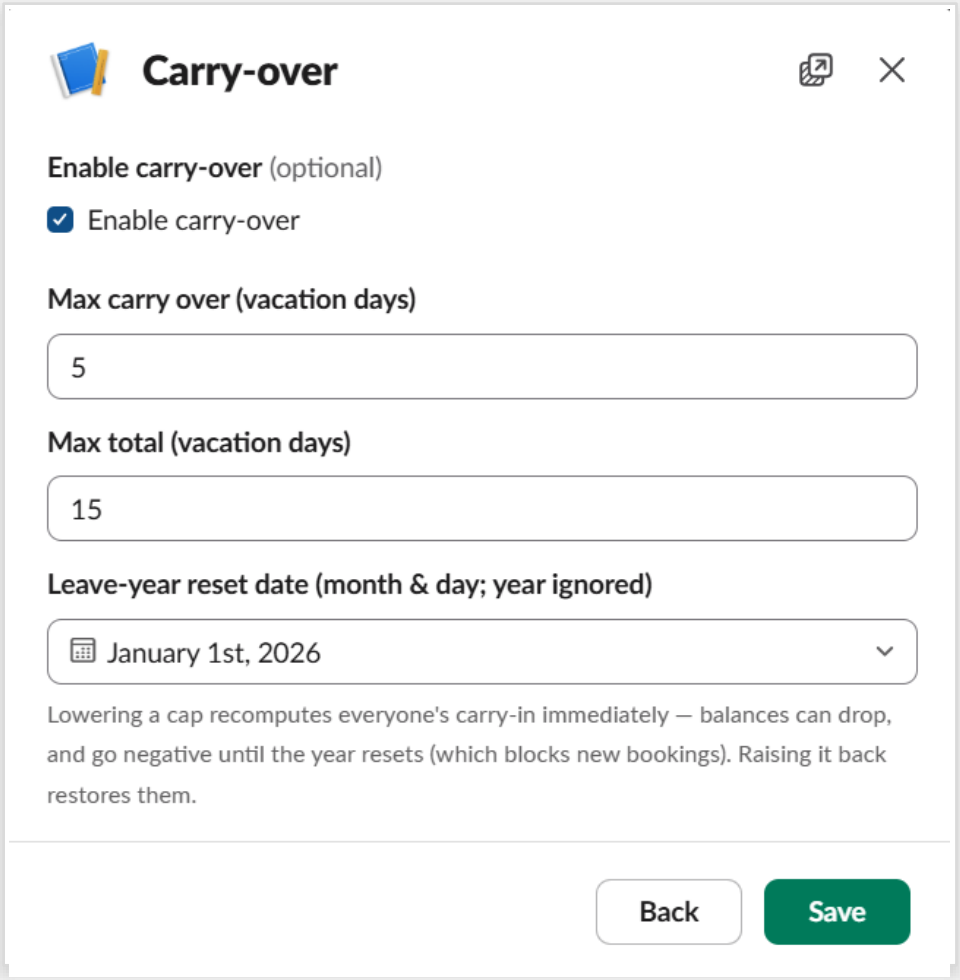

## SET THE RULES ONCE

- Global quota for each type — sick, vacation, personal
- Optional consecutive-day cap on vacation
- Changes take effect immediately across the team

TTMI

# Carry-over

/control › **Carry-over**

## REWARD UNUSED DAYS

- Let people keep unused quota for next year
- Cap how much carries over — and the max total balance
- Set the leave-year reset date (month & day)

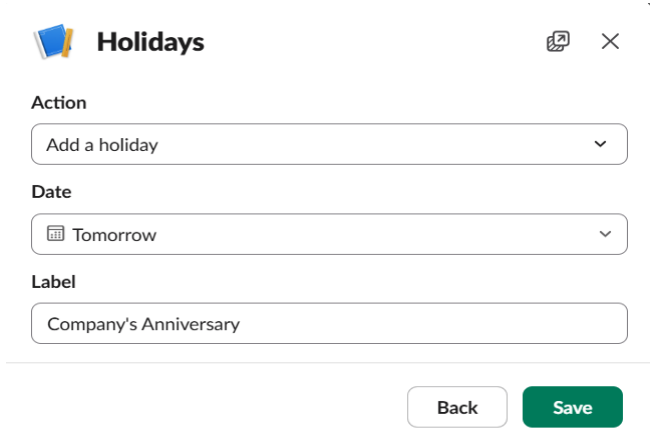

TTMI

# Holidays

/control › Holidays

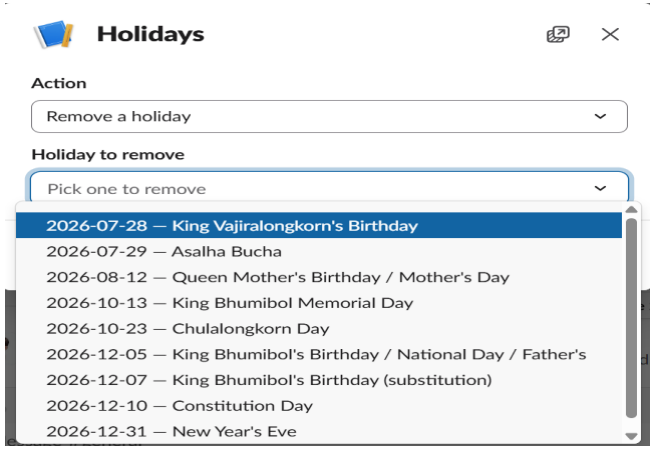

## Add

Add one holiday with a date & label

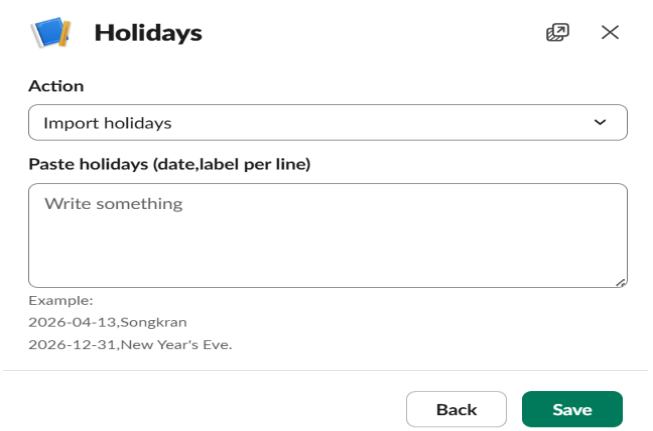

## Remove

Pick from the list to delete

## Import

Paste many at once, one per line

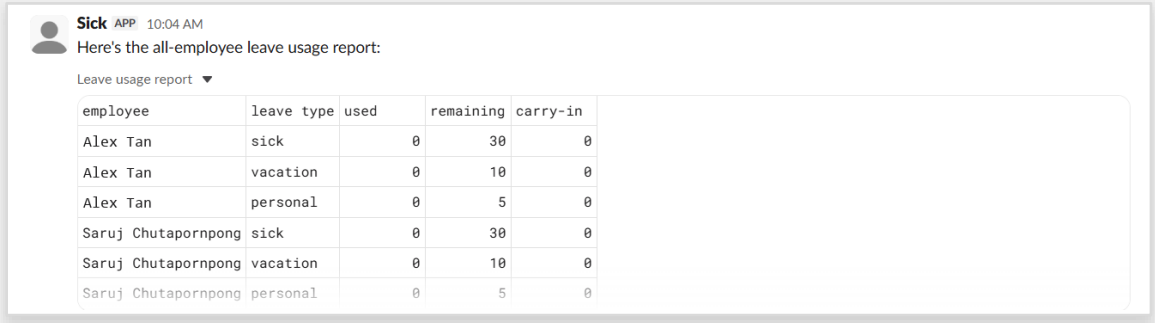

TTMI

# Report

/control › **Report**

**DELIVERED TO YOUR DM · AS CSV**

**Sick** APP 10:04 AM

Here's the all-employee leave usage report:

Leave usage report

| employee | leave type | used | remaining | carry-in |
|---|---|---|---|---|
| Alex Tan | sick | 0 | 30 | 0 |
| Alex Tan | vacation | 0 | 10 | 0 |
| Alex Tan | personal | 0 | 5 | 0 |
| Saruj Chutapornpong | sick | 0 | 30 | 0 |
| Saruj Chutapornpong | vacation | 0 | 10 | 0 |
| Saruj Chutapornpong | personal | 0 | 5 | 0 |

**All-employee quota**

Leave history for Mei Lin:

Leave history — Mei Lin

| employee | leave type | start | end | half | status | working days | reason | decline reason |
|---|---|---|---|---|---|---|---|---|
| Mei Lin | vacation | 2026-08-25 | 2026-08-25 | | approved | 1 | Please. | |

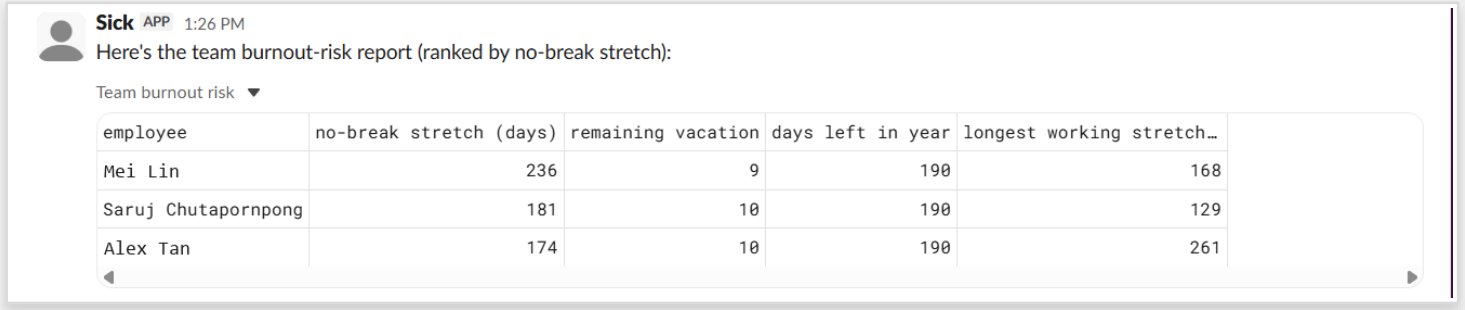

**A single person's history**

- All-employee quota — used, remaining, carry-in
- One person's full leave history
- Team burnout risk (next slide)
- Every report exports as a downloadable CSV

TTMI

# Report

/control › **Report**

| employee | no-break stretch (days) | remaining vacation | days left in year | longest working stretch… |
|---|---|---|---|---|
| Mei Lin | 236 | 9 | 190 | 168 |
| Saruj Chutapornpong | 181 | 10 | 190 | 129 |
| Alex Tan | 174 | 10 | 190 | 261 |

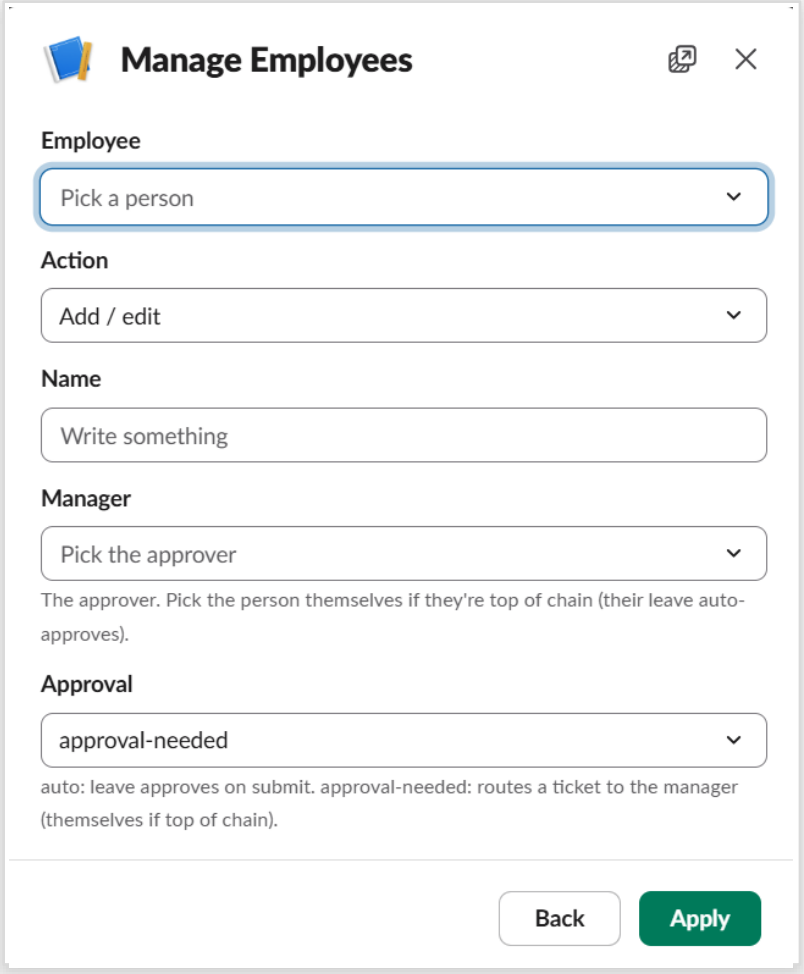

**RANKED BY RISK**

- Longest no-break stretch
- Remaining vacation
- Days left in the year
- Longest working stretch

TTMI

# Manage Employees

/control › **Manage employees**

THREE ACTIONS

## Add / edit

Set a person's name, their manager, and whether leave auto-approves or needs sign-off

## Allowance override

Give one person a custom quota, apart from the central policy

## Delete

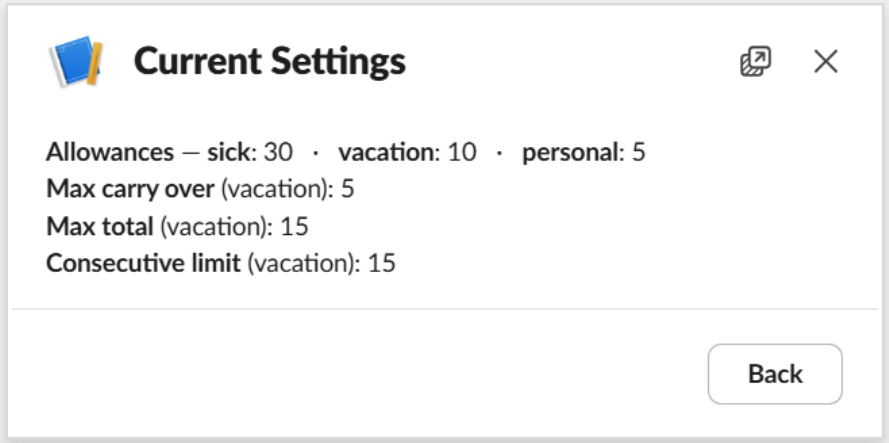

Remove an employee (once their reports are reassigned)

TTMI

# Settings & reset

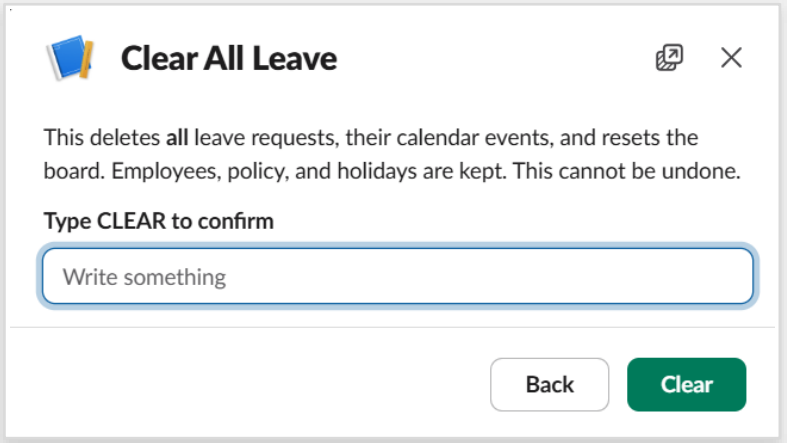

/control › **View settings · Clear**

## View settings

Current policy — allowances, carry-over, caps — at a glance.

## Clear

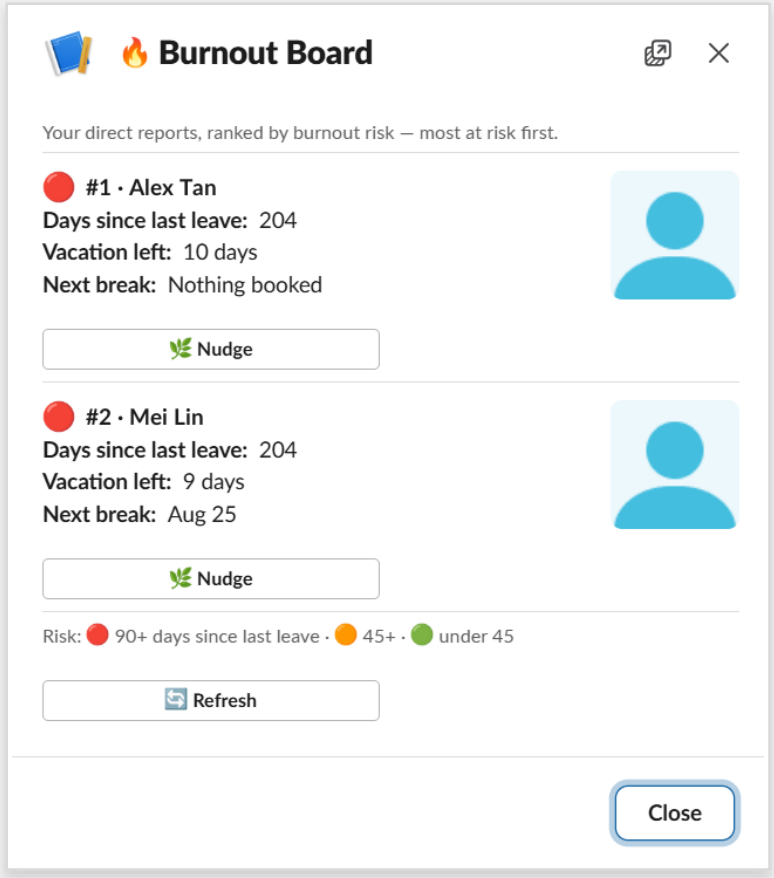

Wipe all requests & calendar events. Type CLEAR to confirm — employees, policy and holidays are kept.

TTMI

# /burnout

## BURNOUT BOARD

LOOK AFTER THE TEAM

## *Spot burnout early*

- Ranks your direct reports by burnout risk
- Shows days since last leave, balance left & next booked break
- One-click Nudge to gently suggest someone takes a rest

90+ days  45+ days  under 45

TTMI

IN SHORT

# Leave that runs itself

## 1 command

replaces the manual DM-and-jot-down loop

## 0 spreadsheets

everything auto-saves and lands on the calendar

## Full control

our data, our policy, our rules — priced pay-per-use

*Plus a Leave Optimizer and a Burnout Board — so the team actually rests.*

TTMI

TTMI

# THANK YOU

Leave management that lives where your team already woks.
